Problem

- Many patients or users have a probelm that all there medical records will be scattered and it will be tough to find them at a particular platform.

- The problem is that many people will not be able to keep a track of their health vitals like glucose levels,BP, etc.

- Patients find it difficult to get the insurance whihever is applicable for their health records .

Solution

HealthMate is an app which is a unique platform which gives an option of inserting your medical records and also gives an option of tracking your health vitals .
It also provides best insurance suitable for the records inserted.
The ultimate goal is to keep all the residents healthy and function at their highest level.

6 HealthMate
FEATURES

01. Health record accumulation.

02. Track your vitals like glucose, BP.

03. Find your best health insurance according to your needs.
